About me

As a dedicated and passionate Front-End Web Developer, I bring a robust skill set in creating dynamic and responsive web applications. My expertise spans across a variety of modern web technologies, ensuring high-quality and user-friendly digital experiences.

Technical Skills:

HTML5 & CSS3: Proficient in crafting semantic, accessible, and visually appealing web pages with the latest standards.

Bootstrap & Tailwind CSS: Skilled in utilizing these frameworks for efficient and responsive design, ensuring seamless performance across devices.

JavaScript & jQuery: Strong command over JavaScript for building interactive and dynamic web functionalities, complemented by jQuery for streamlined scripting.

React, Redux & React Toolkit: Experienced in developing single-page applications with React, managing state effectively with Redux, and leveraging the simplicity and power of React Toolkit to build scalable and maintainable projects.

React Native: Competent in using React Native to develop high-performance mobile applications for both iOS and Android platforms.

TypeScript: Proficient in using TypeScript to enhance code quality and maintainability with type safety.

Experience

Digital It Pro Agency in Bangladesh (Remotely)

January 2023 – January 2024

- Developed responsive web applications with optimal performance.
- Utilized Bootstrap and Tailwind CSS for modern, efficient designs.
- Built scalable SPAs using React, Redux, and React Toolkit.
- Enhanced code quality with TypeScript.
